## EXPERIENCE

---

### Software Engineer

Elixir Technologies

July 2024 - Present

*Islamabad, Pakistan*

- Working as a backend engineer using C++ and ReactTS to improve the Elixir products
- Developing a Word Add-In to help customers design Word documents more efficiently.
- Resolved critical memory problems that affected over 60 projects in Linux, improving overall system performance.
- Created a new technique to debug cloud issues, reducing testing time from 2 hours to 10 minutes, which speed up development and problem-solving.

### Intern Software Engineer

RWR Pvt Ltd

Aug 2022 - Oct 2022

*Islamabad, Pakistan*

- Solved C/C++ programs from different real-world problems
- Created a desktop chat application using Qt C++
- Worked with Google Maps API.

## PROJECTS

---

**Everyday Chronicles:** Created a personalized automated diary app displaying daily activities (location, mood, calls with location, mobile usage) with weekly insights, leveraging Flutter, Dart, Firebase, and external APIs.

**Traders App:** Developed an organization app enabling item management (add, update, delete), price change notifications to employees, and product catalog generation for sharing, utilizing Android Studio, Java, and Firebase.

**POS System:** Build a POS System that hotels, restaurants, and Traders are using. This system provides fast and easy billing, Real-time stock management, Daily Sales, Customer balance reports, integration with Pakistan Revenue Authority (PRA), and much more.
